Academic Details

- **Bachelor of Technology (B.Tech)**
  Information Technology
  Marwdi University, Rajkot;
  CGPA: 9.15

Soft Skills

Analytical | Collaborator | Leader | Adaptable

Technical Skills

- **Programming Languages:**
  JavaScript, Java
- **Frameworks:**
  React, Express, Django

Core Competencies

Computer Network

Software Development Life Cycle

Restful API

Debugging

Operating System

Web Services

Linux

Performance Optimization

Database Management System

Personal Details

Date of Birth: 29th November 2003
Languages Known: English, Hindi and Gujrati
Address: Rajkot, Gujarat

Profile Summary

- I'm Shubham Bhalala, a dedicated B.Tech Information and Technology Engineering student at Marwadi University, currently in my third year. My passion lies in the dynamic field of technology, where I constantly seek out new opportunities to expand my knowledge and skills.
- I have solid knowledge of Programming, Data Structure and Algorithms, Object-Oriented Programming(OOPS), Data Management System, Operating System, Web Development..
- As an enthusiastic learner, I am deeply interested in coding and programming, with a particular curiosity for competitive coding. I actively seek challenges on platforms like LeetCode and GeeksForGeeks and Different-Different coding platform to sharpen my problem-solving abilities and stay abreast of the latest developments in the tech world.

Work Experience

Software Developer Engineer - 1
COMPANY NAME., CITY **June 2022 – March 2024**

Responsibilities:

- Designed and implemented a Monitoring System in Django to enhance edge server health monitoring and alerting capabilities.
- Led the development of API's for Configuration job orchestrator in Express to communicate latest configurations to edge servers over Web socket and Python to apply the configurations on edges.
- Collaborated with cross-functional teams to ensure seamless integration of new technologies and solutions.
- Provided technical guidance and mentorship to junior team members, fostering a culture of continuous learning and growth.
- Undertook the development of a DNS pipeline to optimize edge server selection based on client geo-location and ISP's BGP routing table.

Achievements:

- Streamlined edge server monitoring processes, resulting in an improvement in system uptime and performance.
- Recognized as the best performer in the team for 2023Q4, showcasing dedication and excellence in software development.
- Identified and resolved Thundering Herd problem by implementing Thread Scheduling in Reverse proxy server.

Academic Projects

Portfolio
Tools: React, Django, Docker, Arduino Programming
Roles: Hardware Program, Full-Stack web application, Deployment
PROJECT-DESCRIPTION

Weather App
Tools: HTML, CSS, JavaScript, API
Roles: Hardware Program, Full-Stack web application, Deployment

WeatherAPP is an API based web app completely built using HTML, CSS, and JavaScript. It gives the weather data based on the user's current location and also by search query given by the user.It gives weather images base on the weather. It has a minimalist UI, and it's fully responsive and mobile friendly.
